

EVOLUTION COILOVER STRUTS & SHOCKS

Nolathane Evolution Coilovers - These kits are the latest in height adjustable coil-overs and feature replaceable cartridges, 65mm ID motor sport coils and include **Nolathane** bushes & bracketry for OE mounts & connections. The 75mm threaded body is anodised to provide a rust-proof good looking finish on the threaded section prior to powder coating the remainder of the body. Correct camber settings have been incorporated into the design and each kit includes a C-spanner for quick height adjustment.

Nolathane has now incorporated **Evolution** Coilovers into the vehicle listings as well as the replacement inserts to service the **Evolution** Coilovers. Each replacement insert contains a pair of inserts and 2 new retaining nuts.
N.B: Refer application listing of specific fitment

POLISHED ALLOY STRUT BRACES

Nolathane Evolution Polished Alloy Strut Braces reduce body or chassis flexing and therefore maintain alignment settings. Just as the roll cage in a race car plays a key role in chassis stiffness and handling - strut braces assist chassis rigidity and handling performance.
