

## Steering Coupling 41089 To suit Nissan Skyline R31

Nolathane Kit 41089 is a replacement steering column coupling kit for the Nissan Skyline R31 series. Previously, the only way you were able to obtain the coupling, was to purchase the complete steering column assembly as original equipment did not supply this part separately.

Second hand items, which cost approximately \$600, have become difficult to obtain as a result. If a complete unit is sourced, the possibility of the second hand unit being in a serviceable condition is debatable.

Nolathane Kit 41089 contains all the necessary components and fitting instructions, to allow for easy replacement installation of the coupling.
