

NOLATHANE 4WD PRODUCTS

Nolathane has released the Shock Absorber Stone Shield (part number 49112) to protect shock absorbers and their mountings from damage, shot peening, pitting, and sand blasting from the rocks and sand thrown up by a vehicle's tyres.

The shield is designed for 4WD vehicles travelling on dirt roads, outback tracks and sand dunes, but can be easily fitted to any vehicle or shock absorber that requires protection.

The universal shock shield is attached to the lower body of the shock absorber to cover and protect the body and the lower mounting point from damage.

It is attached via the supplied cable ties which fit through the reinforcing ribs built into the robust design.

If the cable ties become damaged, they can simply be replaced and the shields refitted with new ties.

Stainless steel CV boot clamps can also be used in more extreme conditions as an alternative to the cable ties supplied.

The kit comes with two universal shock shields and four cable ties and will fit most OE and AM shock absorbers.

Nolathane has also released the Hi-Lift Jack Handle Keeper (part number 49113). Annoying rattles, tie wire, duct tape and lost jack handles are a thing of the past with the handle keeper, which is designed specifically to fit Hi-Lift style off road type jacks.

The new rugged polyurethane Hi-Lift jack handle keeper slides over the jack handle and the I-beam securing the jack handle to the jack itself.

“

If the cable ties become damaged, they can simply be replaced and the shields refitted with new ties.

”

It keeps the handle in place when the jack is not in use, making transporting a Hi-Lift jack much quieter and easier while travelling down bumpy outback roads.

Nolathane's jack handle isolators have a unique design allowing the handle keeper to be slipped on or off the jack without having to remove the top clamp/clevis and they fit all Hi-Lift brand jacks.

For more information, call the Nolathane technical hotline on 1300 88 23 55 or visit the website www.nolathane.com.au

Nolathane's 49113 designed to fit on top of the handle for ease of install or removal.

Nolathane's 49112 Shock Absorber Shield are sold in pairs and are easily fitted to any shock absorber.
