

Nolathane Aluminium Lowering Blocks & Nolathane Trailer & Vehicle Axle U Bolts

Nolathane aluminium lowering blocks are the economical and quick way to lower many leaf sprung vehicles. Available in 1.5", 2" & 2.5" for most applications which are summarised in the table below. Today the lowering block market is not confined to old leaf sprung vehicles. The recent upsurge in utility sales have driven sales growth in lowering blocks. The Fast 4 category of utes such as HiLux, Navarra & Rodeo are being lowered and having bigger wheel & tyre packages installed every day. Additionally, the success of Ford's Falcon ute and the Holden Crewman & 1 Tonner are a big part of the emerging sports ute category. These vehicles are also being transformed as they are "dropped" or "decked" to improve handling and looks.

Each kit contains: 1 pair of lowering blocks
4 U bolts
8 serrated flange nuts
Instructions of fitment

All Nolathane blocks are extruded aluminium for higher quality, ease of fitment & safety.

CHECK WITH YOUR STATE AUTHORITY BEFORE SELLING OR FITTING EXTRA LOW KITS.

NOLATHANE LOWERING BLOCK KIT - PART NUMBER APPLICATION & SIZE LISTING

Nolathane U bolts are a cost effective solution for replacing old, rusted, damaged or broken U bolts on most leaf sprung trailers & vehicles. Each kit contains two U bolts and four serrated flange nuts - sufficient for one side only.

Nolathane trailer U bolts are available in round & square top.

All Nolathane U bolts are manufactured from OE grade steel and are zinc plated for protection against rust & corrosion.
