

Nolathane Part No's. 49112, 49113

Universal Shock Absorber Stone Shield & Hi-lift Jack Handle Holder.

Nolathane 49112 Shock Absorber Stone Shield

Manufactured from **Nolathane**, these shock shields protect your shock absorbers and their mountings from damage, shot peening, pitting, and sand blasting from the rocks and sand thrown up by the vehicles tyres. Designed primarily for 4WD vehicles travelling on dirt roads, outback tracks and sand dunes, but can be easily fitted to any vehicle or shock absorber that requires protection. These universal shock shields are attached to the lower body of the shock absorber to cover and protect the body and the lower mounting point from damage. They attach via supplied cable ties which fit through the reinforcing ribs built into the robust design. Another feature is if the cable ties become damaged they can simple be replaced and the shields refitted with new ties. Stainless steel CV boot clamps can also be used in more extreme conditions as an alternative to the cable ties supplied. Ensure mounting of the shields does not foul the operation of the shock absorber or other parts of the suspension. The kit comes with 2x universal shock shields and 4x cable ties and will fit most OE and after market shock absorbers.

Nolathane's 49112 Shock Absorber Shield sold in pairs and easily fitted to any shock absorber

Nolathane 49113 Hi-lift Jack Handle Keeper

Say goodbye to annoying rattles, tie wire, duck tape and lost jack handles.

Designed specifically to fit Hi-lift style off road type jacks, **Nolathane's** new rugged polyurethane Hi-Lift jack handle keeper simply slides over the jack handle and the I-beam securing the jack handle to the jack itself, keeping the handle in place when the jack is not in use, and makes transporting your Hi-Lift jack much quieter and easier while travelling down those bumpy outback roads. No more rattling or lost jack handles! **Nolathane's** jack handle isolators have a unique design allows the Handle Keeper to be slipped on or off the jack without having to remove the Top Clamp/Clevis and fit all Hi-Lift brand jacks.

Nolathane's 49113 designed to fit on top of the handle for ease of install or removal
