

### ONE AT A TIME!!!! SINGLE SWAY BAR 'BALL' LINKS

**Nolathane** have released most of its current sway bar 'ball' link range as a single link option. **Nolathane** complete sway bar link kits are the "Total Solution" as they include high quality and long lasting ball jointed link pins and mounting hardware. The range consists of both vehicle specific and universal link kits.

These single units utilise similar part numbering as its parent kit (pair) but with a suffix added. For example, the following suffix refers to;

- S** = single link kit suiting either LHS or RHS of vehicle
- L** = single link kit suiting LHS of vehicle only
- R** = single link kit suiting RHS of vehicle only

For the complete range of **Nolathane** sway bar links see the Edition 10 **Nolathane** catalogue or visit the website at [www.nolathane.com.au](http://www.nolathane.com.au)

### NEW VEHICLE ENHANCEMENT KITS

The range of Vehicle Enhancement Kits has increased with 13 new kits added to the **Nolathane** range. The main increase comes from VE Commodore with Front & Rear, Front only or Rear only, with options for standard or performance applications. We have also created performance kits for earlier IRS Commodores including a rear traction control option for high horse power Commodores that suffer from axle hop under acceleration.

Model	Kit	Nolathane Part #	Comment
Commodore VE, WM	Full Vehicle Kit	<b>EVOCOM6</b>
