

**NOLATHANE YOUR HATCHBACK!!!**

**MAZDA 3 & FORD FOCUS**

**PRODUCTS NOW AVAILABLE!**

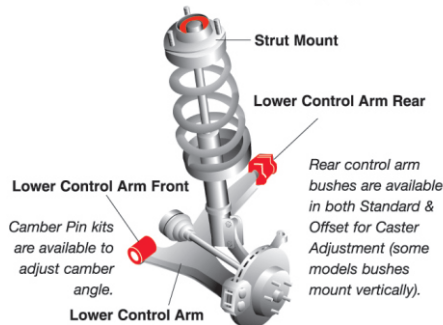

If your car gets you from A to B, worn suspension components could end up costing you, especially since it can create an unpredictable vehicle whilst braking & cornering. Many small front wheel drive hatchback vehicles tend to "pull" to the left whilst driving in a straight line, which actually causes uneven tyre wear and in no time you need to replace your tyres which can hit your hip pocket hard. Fitting **Nolathane's** affordable offset or adjustable caster bushes to the lower front control arms corrects this problem. Also your vehicles body roll whilst cornering is managed by a sway/ stabiliser bar that's connected by 2 mounting points and end links to your cars chassis. Its quite common for these the mounts and links to wear or even break which can create excess body roll and a more unstable vehicle whilst cornering. In order to keep you car reliable and safe, here are some key suspension areas that you should have checked and maintained regularly:

**MAZDA 3 BK 1/2004-3/2008 (incl MPS)**  
**FORD FOCUS LS/LT 5/2005 on (incl XR5)**

F or R	Description	Nolathane Part #	Kits Req	Bushes in Pack	Notes
