

# Instructions

## Polyurethane Bump-stops

**N.B:** This instruction sheet should be used in conjunction with the workshop manual and proper safety procedures followed.

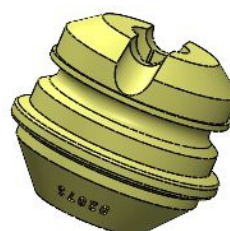

- The fitment of lowered coil springs requires a firmer shorten bump stop, to control ride and allow suspension adequate travel.

- This Universal replacement unit is designed to maintain the bump travel with lowered suspension. This, in some applications, requires trimming the foam bump stop to the required length ref.

**Application** - Suited for lowered vehicles with strut style suspension  
- Suits 19-22mm shock shaft.

**Contents** - Bump-stop 92073 x2  
- Dust cover 92074 x2

Note - the supplied dust cover can be clipped onto the bump stop

75 duro Poly bump-stop

Poly dust cover

Note - the dust cover may be trimmed if required OR simply not used if application doesn't permit.

**N.B:** It is recommended that a licenced workshop or tradesperson carry out the above procedure and that workshop manual and relevant safety procedures are followed in addition to the above.
